Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.The Social Security program pays benefits to retired or disabled workers and their family members, and to family members of deceased workers. Program income and outgo are accounted for in two separate trust funds authorized under Title II of the Social Security Act: the Federal Old-Age and Survivors Insurance (OASI) trust fund and the Federal Disability Insurance (DI) trust fund. This report refers to the two trust funds as an aggregate Social Security trust fund and discusses the operations of the OASI and DI trust funds on a combined basis. Social Security is financed by payroll taxes paid by covered workers and their employers, federal income taxes paid by some beneficiaries on a portion of their benefits, and interest income from the Social Security trust fund investments. Social Security tax revenues are invested in federal government securities (special issues) held by the trust fund, and these federal government securities earn interest. The revenues exchanged for the federal government securities are deposited into the general fund of the U.S. Treasury and are indistinguishable from revenues in the general fund that come from other sources. Because the assets held by the trust fund are federal government securities, the trust fund balance represents the amount of money owed to the Social Security trust fund by the general fund of the U.S. Treasury. Funds needed to pay Social Security benefits and administrative expenses come from the redemption or sale of federal government securities held by the trust fund.
