Thomas Robert Malthus published his first Essay on the Principle of Population in 1798 in order to refute the views expressed by utopian writers and philosophers who believed that society could be reshaped in a new form which would lead to a better life for all. Malthus thought that this would never work simply because there would never be enough food to support an idealistic society. In his works Malthus set up laws about society based on past and present evidence and he tried to make future predictions of populations. Although his work has been very influential, it was his fate to frame an analysis of the relationship between population, economy and society during the last generation to which it was applicable. There have been many studies to show whether Malthus was correct for his time and some limitations of his writings have been...
