

## The Sunday-School World Volume 22, No. 2

Filesize: 1.33 MB

### ***Reviews***

*This book is definitely not straightforward to get started on studying but extremely exciting to read. It is really simplistic but shocks in the 50 percent of the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.*

## THE SUNDAY-SCHOOL WORLD VOLUME 22, NO. 2

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 26 pages. Original publisher: Seattle, Wash. : Pacific Marine Environmental Laboratory, 2001 OCLC Number: (OCoLC)317624574 Subject: Winds -- Speed -- Measurement. Excerpt: . . . ATLAS Wind Calibration Procedures and Instrumental Accuracies 11 Table 4: Vane calibration error statistics for calibration checks made before rmware, circuitry, and alignment errors were discov-ered. N is the number of instruments calibrated. Negative values imply that measured orientation is clockwise, or to the right, of the true orientation. Standard Type N Minimum Maximum mean Deviation RMS ( deg. ) ( deg. ) ( deg. ) ( deg. ) ( deg. ) Pre-deployment 188 - 5. 7 5. 8 0. 28 1. 13 1. 16 Post-recovery 115 22. 5 14. 0 1. 01 3. 19 3. 23 All 303 22. 5 14. 0 0. 56 2. 14 2. 19 error was small ( 0. 28 ) for pre-deployment calibration checks, and only slightly larger ( 1. 01 ) for post-recovery calibration checks. Thus the mean error did not change appreciably during deployment. Since mean errors were small, standard deviation and RMS error were nearly the same. The error standard deviation was 1. 13 for pre-deployment calibration checks with a range of maximum errors of about 6. As would be expected, errors were larger for recovered sensors, with an error standard deviation of 3. 19 and range from 22 to 14. The error standard deviation was 2. 14 for the combined set of pre-deployment and post-recovery instruments. The location of the wind vane dead zone was also checked before deploy-ment and after recovery of the sensors. The values presented here ( Table 5 ) have been adjusted to rect the alignment bias described in section 2. 2. On average, the width of the dead...
