FITNESS FOR GEEKS: REAL SCIENCE, GREAT NUTRITION, AND GOOD HEALTH

O'Reilly Media. Paperback. Book Condition: New. Paperback. 336 pages. Dimensions: 9.7in. x 7.9in. x 0.7in. This inquisitive and highly useful book shows the hacker and maker communities how to bring science and software into their nutrition and fitness routines. The digital age has made a big splash with new web-connected gear in the sportsfitness world. Fitness for Geeks covers many of these new self-tracking tools and apps, including Endomondo, FitBit, Garmin Connect, Alpine Replay, Zeo, and more. The book shows you how the gear and apps work, relate to human physiology, and can be hacked and integrated into your lifestyle and fitness routine. The book includes an eclectic mix of interviews with a wide range of experts, including two NFL pro football players, a mountaineering guide, a national expert on vitamin C, a runner who won a hot Boston Marathon, a scientist who tests the effects of fasting on mice and tumors, an MIT scientist who studies our mTOR growth pathway, an expert sports masseuse, and a former Israeli soldier who studied the diet of the Spartans, Greeks, and Macedonians. Fitness For Geeks has detailed chapters on nutrition as well as outdoor and indoor fitness and sports, with explanations of various protocols (for resistance training and sprinting), the physiological aspects of exercise (such as metabolic equivalent of task and calculating your basal metabolic rate (BMR)...
