Synthetic and Biophysical Studies on the Tridachiahdropyrone Family of Natural Products

By Kimberley Jade Powell

Springer-Verlag GmbH Nov 2015, 2015. Buch. Book Condition: Neu. 244x164x14 mm. Neuware - This thesis addresses fundamental scientific questions such as: How are complex natural products synthesized in vivo Can we replicate these conditions in a laboratory environment What is the biological function of such secondary metabolites What are the biological origins of chirality These issues are explored in an accessible manner using a multidisciplinary approach spanning chemistry, biology and physics to investigate an interesting family of complex natural products isolated from marine molluscs - the tridachiahdropyrones. The work has achieved: Elegant biomimetic syntheses of a number of the tridachiahdropyrone compounds in vitro using organic synthesis techniques The characterization of the interactions between these compounds and a range of model membrane systems using a series of fluorescence spectroscopic studies The investigation of the antioxidant and photoprotective properties of the compounds by means of biophysical assay techniques The synthesis of tridachiahdropyrone utilizing the model membrane systems as biomimetic reaction media. 136 pp. Englisch.

Reviews

If you need to adding benefit, a must buy book. I could comprehended every thing out of this composed e pdf. I am just very happy to tell you that this is the greatest pdf i have study inside my individual existence and could be he finest publication for at any time.

-- Miss Laurie Waters IV

Most of these publication is the greatest publication offered. It is actually rally intriguing throug reading period of time. You can expect to like just how the article writer create this publication.
