

An applied approach to carbo and sulfo analogues of polybetaine system

Filesize: 5.05 MB

Reviews

*This pdf might be well worth a study, and a lot better than other. It really is simplistic but excitement inside the fifty percent in the book. Its been printed in an exceedingly straightforward way which is just after i finished reading this ebook through which really modified me, modify the way i believe.
(Derick Brekke)*

AN APPLIED APPROACH TO CARBO AND SULFO ANALOGUES OF POLYBETAINE SYSTEM

To read **An applied approach to carbo and sulfo analogues of polybetaine system** eBook, make sure you follow the link beneath and save the file or gain access to other information that are related to AN APPLIED APPROACH TO CARBO AND SULFO ANALOGUES OF POLYBETAINE SYSTEM ebook.

LAP Lambert Academic Publishing Jan 2013, 2013. Taschenbuch. Book Condition: Neu. 220x150x11 mm. This item is printed on demand - Print on Demand Neuware - This book focuses on the synthesis of novel representatives of sulfobetaine and carbobetaine polymers. Their synthesis, characterization and applications as photoluminescent material, biocompatible material and in analytical chemistry are presented here. A series of 7 copolymers is synthesized and presented in this book. Chapter 1 presents a relevant description of the state of art through literature survey. The synthesis, physical properties, characterization techniques and various experimental procedures are presented in chapter 2. Chapter 2 incorporates thermal degradation characteristics and antibacterial properties of these polymers. One of the sulfobetaine polymer showed photoluminescence characteristics which was studied in steady state as well with varying time domain and results are discussed in chapter 3. One of the polycarbobetaine was crosslinked with a diacrylate crosslinker and a series of gel was synthesized and studied in detail for their swelling characterization and their results are discussed in chapter 4. Chapter 5 and 6 deals with representatives of polybetaine tested as a novel polymer format for molecular imprinting of L-aspartic acid and baclofen drug. 188 pp. Englisch.
