

Sampling of Populations: Methods and Applications - Solutions Manual (4th Revised edition)

By Paul S. Levy, Stanley Lemeshow

John Wiley and Sons Ltd. Paperback. Book Condition: new. BRAND NEW, Sampling of Populations: Methods and Applications - Solutions Manual (4th Revised edition), Paul S. Levy, Stanley Lemeshow, A trusted classic on the key methods in population sampling-now in a modernized and expanded new edition Sampling of Populations, Fourth Edition continues to serve as an all-inclusive resource on the basic and most current practices in population sampling. Maintaining the clear and accessible style of the previous edition, this book outlines the essential statistical methods for survey design and analysis, while also exploring techniques that have developed over the past decade. The Fourth Edition successfully guides the reader through the basic concepts and procedures that accompany real-world sample surveys, such as sampling designs, problems of missing data, statistical analysis of multistage sampling data, and nonresponse and poststratification adjustment procedures. Rather than employ a heavily mathematical approach, the authors present illustrative examples that demonstrate the rationale behind common steps in the sampling process, from creating effective surveys to analyzing collected data. Along with established methods, modern topics are treated through the book's new features, which include: A new chapter on telephone sampling, with coverage of declining response rates, the creation of "do not...
