INCREASING RESILIENCY TO NATURAL HAZARDS: A STRATEGIC PLAN FOR THE MULTI-HAZARDS DEMONSTRATION PROJECT IN SOUTHERN CALIFORNIA: OPEN-FILE REPORT 2007-1255 (PAPERBACK)

To read **Increasing Resiliency to Natural Hazards: A Strategic Plan for the Multi-Hazards Demonstration Project in Southern California: Open-File Report 2007-1255 (Paperback)** eBook, you should click the web link below and save the document or have accessibility to additional information which might be relevant to INCREASING RESILIENCY TO NATURAL HAZARDS: A STRATEGIC PLAN FOR THE MULTI-HAZARDS DEMONSTRATION PROJECT IN SOUTHERN CALIFORNIA: OPEN-FILE REPORT 2007-1255 (PAPERBACK) ebook.

Bibliogov, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.The U.S. Geological Survey (USGS) is initiating a new project designed to improve resiliency to natural hazards in southern California through the application of science to community decision making and emergency response. The Multi-Hazards Demonstration Project will assist the region s communities to reduce their risk from natural hazards by directing new and existing research towards the community s needs, improving monitoring technology, producing innovative products, and improving dissemination of the results. The natural hazards to be investigated in this project include coastal erosion, earthquakes, floods, landslides, tsunamis, and wildfires. Americans are more at risk from natural hazards now than at any other time in our Nation s history. Southern California, in particular, has one of the Nation s highest potentials for extreme catastrophic losses due to natural hazards, with estimates of expected losses exceeding \$3 billion per year. These losses can only be reduced through the decisions of the southern California community itself. To be effective, these decisions must be guided by the best information about hazards, risk, and the cost-effectiveness of mitigation technologies. The USGS will work with collaborators to set the direction of the research and to create multi-hazard risk frameworks where communities can apply the results of scientific research to their decision-making processes. Partners include state, county, city, and public-lands government agencies, public and private utilities, companies with a significant impact and presence in southern California, academic researchers, the Federal Emergency Management Agency (FEMA), National Oceanic and Atmospheric Administration (NOAA), and local emergency response agencies. Prior to the writing of this strategic plan document, three strategic planning workshops were held in February and March 2006 at the USGS office in Pasadena to explore potential...
